

CLINICAL AI PARTNERS OXFORD × UNIVERSITY OF GLOBAL HEALTH EQUITY

A Report from Rwanda

AI safety and fluency for the global health workforce.
Kigali & Butaro · July 2026

DR EVE COATES · FOUNDER & CLINICAL LEAD

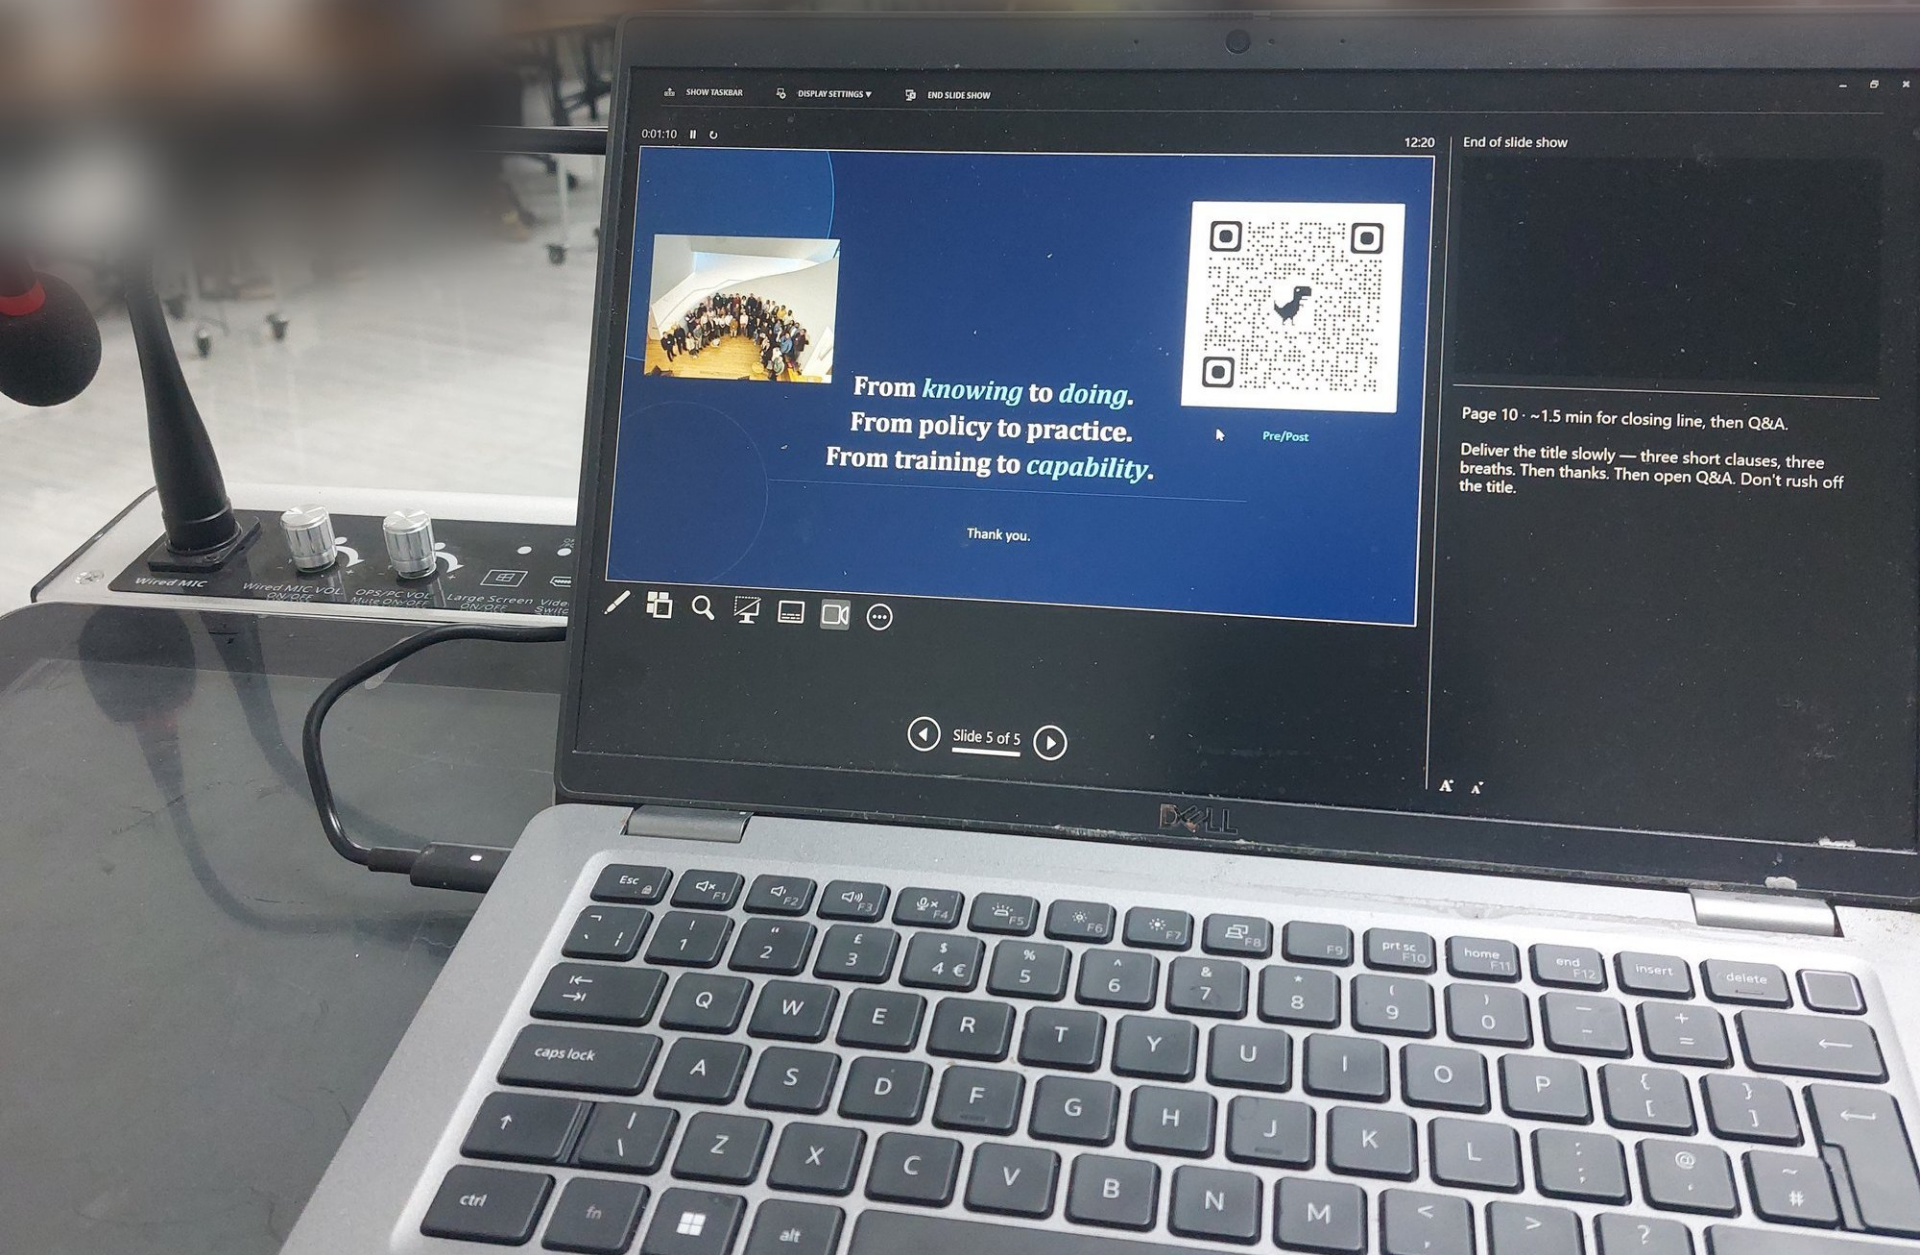

www.clinicalaipartners.org

01 · KIGALI HQ

CAIP × UGHE · 02 / 10

Two cohorts — faculty and operations staff — walked the clinical AI pipeline end to end: six modules, from inside the black box to data sovereignty and equitable AI.

02 · THE ASSIGNMENT

CAIP × UGHE · 03 / 10

“From knowing to doing. From policy to practice. From training to capability.” The closing slide — and the whole point. Not model-builders: calibrated, critical supervisors of AI.

04 · PARTNERSHIP

CAIP × UGHE · 05 / 10

With Prof Rex Wong. Every finding from the seminars went back to UGHE as an evidence report — partnership means data flowing both ways, and local faculty as scientific collaborators.

05 · NORTH TO BUTARO

CAIP × UGHE · 06 / 10

Butaro campus, Burera District — home to UGHE's medical and masters students, in the hills of the land of a thousand hills.

06 · THE VENUE

CAIP × UGHE · 07 / 10

Walking the lecture theatre by night — where, in January, the CAIP × UGHE Global Health AI Hackathon comes to Butaro.

07 • LEGACY

CAIP × UGHE • 08 / 10

In a place that he loved — imigongo patterns on the wall, and a mission you can feel in the walls themselves.

08 · UNTIL JANUARY

CAIP × UGHE · 09 / 10

A privilege to stand in Dr Paul Farmer's legacy. Last light over Butaro — we return in January: medical and masters students, one hackathon, and the next chapter of the partnership.

What happens next

The seminars confirmed what CAIP was built on: readiness for clinical AI cannot be self-declared — it must be measured. Our paired pre/post assessment gave UGHE an objective read on where confidence outstrips competence, and a roadmap to close the gap.

In January 2027, CAIP × UGHE run the Global Health AI Hackathon at Butaro campus: scenario-based training that moves medical and masters students from knowing about AI to safely, critically doing — and every contact feeds an evidence base on real AI readiness across the global health workforce.

Butaro hackathon

Education × Data — for safe, equitable clinical AI.

Dr Eve Coates · Founder & Clinical Lead · www.clinicalaipartners.org

With gratitude to Prof Rex Wong and the faculty, staff and students of the University of Global Health Equity.
